Legislation

The following legislations were taken into account during the preparation of the Financial Statements: Constitution of the Republic of South Africa 1996, Municipal Systems Act 32 of 2000, Municipal Finance Management Act 56 of 2003, Municipal Property Rates Act 6 of 2004, Municipal Structures Act 117 of 1998 and Division of Revenue Act.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Officer's Responsibilities and Approval

The Accounting Officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records; responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and were given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied, supported by reasonable and prudent judgements and estimates.

The Accounting Officer acknowledges that he is ultimately responsible for the system of internal control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the Accounting Officer to meet these responsibilities, the Accounting Officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The Accounting Officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The Accounting Officer has reviewed the municipality's cash flow forecast for the year ending 30 June 2018 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue its operational existence for the foreseeable future.

The municipality is dependent on the grant allocations through the Division of Revenue Act (2016) for continued funding of operations. The annual financial statements are prepared on the basis that the municipality is a going concern and that the Impendle Municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the Accounting Officer is primarily responsible for the financial affairs of the municipality, he is supported by the municipality's Chief Financial Officer.

Auditor General of South Africa is responsible for independent review of Annual Financial Statements and expressing an opinion on fair presentation.

The annual financial statements set out on page 5 to 64, which have been prepared on the going concern basis, were approved by the Accounting Officer on 31 August 2017 and were signed on its behalf by:

Accounting Officer
Kunene O.V. (Mr)

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Statement of Comparison of Budget and Actual Amounts

Budget on Accrual Basis

	Approved budget	Adjustments	Final Budget	Actual amounts on comparable basis	Difference between final budget and actual	Reference
Figures in Rand						
Accumulated surplus	107 686 960	29 000	107 715 960	110 042 882	2 326 922	
Total Net Assets	107 686 960	16 568 630	124 255 590	125 496 090	1 240 500	

1. Operating lease asset- this relates to lease rental income which was budgeted for under rental of facilities.

Receivables from exchanged transactions- budget included estimated revenue due to the municipality for rental for new contracts entered into during the reporting period.

2. VAT receivable- a portion of VAT refund is included in the non-exchange receivables budget.

3. Consumer debtors- new valuation roll commenced and property values increased which resulted in increase in debtors book.

4. Cash and cash equivalents- budget projections relates to 100% expenditure incurred for the year relating to conditional grants.

5. Intangible assets- this item was budgeted for under the property, plant and equipment line item.

6. Operating lease liability- this item was budgeted for under the operating lease expenses.

7. Payables from exchanged transactions- budget projections included anticipated unspent grant expenditure from previous financial year.

8. Unspent conditional grants and receipts- item budgeted for under payables from exchange transactions budget.

9. Long-term loan- a new loan was taken during the reporting period, processes for the approval of the loan were expected to be concluded during 2015/2016 financial year therefore the loan liability was budgeted for in the 2015/2016 financial year.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice, issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements.

Trade receivables and receivables

The municipality assesses its trade receivables and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the municipality makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables and receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio.

Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the municipality is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The municipality uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows.

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of and tangible assets.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.3 Significant judgements and sources of estimation uncertainty (continued)

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 15 - Provisions.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Allowance for doubtful debts

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Useful lives of property, plant and equipment and intangible assets

As described in Accounting Policies 1.5 and 1.7, the municipality depreciates/amortises its property, plant and equipment, and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful lives, which is determined when the assets are available for use. The useful lives and residual values of the assets are based on industry knowledge.

Provision for Rehabilitation of Landfill Site

The municipality has an obligation to rehabilitate its refuse transfer station. Provision is made for this obligation based on the size / extent of the land to be rehabilitated. Current costs are projected based on the fair value calculations by the Engineering Consultants, using the average rate of inflation over the remaining period until rehabilitation.

Allowance for doubtful debts

The measurement of receivables is derived after consideration of the allowance for doubtful debts. Management makes certain assumptions regarding the categorisation of debtors into groups with similar risk profiles so that the effect of any impairment on a group of receivables would not differ materially from the impairment that would have been determined had each debtor been assessed for impairment on an individual basis. The determination of this allowance is predisposed to the utilisation of estimates, assumptions and management judgements. In determining this allowance the estimates are made about the probability of recovery of the debtors based on their past payment history and risk profile.

1.4 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, the cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.4 Investment property (continued)

Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the municipality determines that the fair value of an investment property under construction cannot be determined reliably but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the municipality determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the municipality measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The municipality applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the municipality becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

1.5 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.5 Property, plant and equipment (continued)

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses except for Infrastructure Assets and Investment Property Assets which are carried at revalued amount being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings when the asset is derecognised.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings as the asset is used. The amount transferred is equal to the difference between depreciation based on the revalued carrying amount and depreciation based on the original cost of the asset. The municipality uses a net replacement value method as a measurement basis for determining gross carrying amount on property, plant and equipment.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited in revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land	Straight line	Unfinite
Buildings	Straight line	30
Plant and machinery	Straight line	10-15
Furniture and fixtures	Straight line	10
Motor vehicles	Straight line	5-7
Office equipment	Straight line	
• Computer Hardware		4
• Office Machinery		3-5
IT equipment	Straight line	3-5

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.5 Property, plant and equipment (continued)

Computer software	Straight line	3-5
Infrastructure- Roads	Straight line	10-15
Community	Straight line	
• Sportfields		30
• Community Halls		30
Other property, plant and equipment	Straight line	
• Security Measures 3		3
• Security Measures 5		5
Other equipment	Straight line	
• Kitchen Equipment		5-7
Communication equipment	Straight line	
• A/V Equipment		5

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note).

Derecognition

Item of property, plant and equipment are derecognised when the asset is disposed off or when there are no future economic benefits or service potential expected from the use of an asset, the gain or losses arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.6 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which a municipality incurs either when the item is acquired or as a consequences of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

If the related asset is measured using the revaluation model:

- (a) changes in the liability alter the revaluation surplus or deficit previously recognised on that asset, so that:
 - a decrease in the liability (subject to (b)) is credited to revaluation surplus in net assets, except that it is recognised in surplus or deficit to the extent that it reverses a revaluation deficit on the asset that was previously recognised in surplus or deficit
 - an increase in the liability is recognised in surplus or deficit, except that it is debited to the revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.
- (b) in the event that a decrease in the liability exceeds the carrying amount that would have been recognised had the asset been carried under the cost model, the excess is recognised immediately in surplus or deficit; and
- (c) a change in the liability is an indication that the asset may have to be revalued in order to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period. Any such revaluation is taken into account in determining the amounts to be taken to surplus or deficit or net assets under (a). If a revaluation is necessary, all assets of that class are revalued.

1.7 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.7 Intangible assets (continued)

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software, other	3 - 5 years

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible assets is included in surplus or deficit when the asset is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.8 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary loan is a loan granted to or received by a entity on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from a entity's statement of financial position.

Accounting Policies

1.8 Financial instruments (continued)

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at a future date.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
 - receive cash or another financial asset from another entity; or
 - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.8 Financial instruments (continued)

A residual interest is any contract that manifests an interest in the assets of a entity after deducting all of its liabilities. A residual interest includes contributions from owners, which may be shown as:

- equity instruments or similar forms of unitised capital;
- a formal designation of a transfer of resources (or a class of such transfers) by the parties to the transaction as forming part of a entity's net assets, either before the contribution occurs or at the time of the contribution; or
- a formal agreement, in relation to the contribution, establishing or increasing an existing financial interest in the net assets of a entity.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

1.9 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.9 Leases (continued)

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.10 Impairment of cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.10 Impairment of cash-generating assets (continued)

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standard of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

Accounting Policies

1.10 Impairment of cash-generating assets (continued)

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.11 Impairment of non-cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the municipality; or
- (b) the number of production or similar units expected to be obtained from the asset by the municipality.

Criteria developed by the municipality to distinguish non-cash-generating assets from cash-generating assets are as follow:
[Specify criteria]

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also test a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.11 Impairment of non-cash-generating assets (continued)

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the municipality recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.11 Impairment of non-cash-generating assets (continued)

Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

1.12 Employee benefits

Employee benefits are all forms of consideration given by a entity in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party (as defined in the Standard of GRAP on Related Party Disclosures) of the reporting entity, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting entity's own creditors (even in liquidation) and cannot be paid to the reporting entity, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting entity to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- a entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from a entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.12 Employee benefits (continued)

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The recognise the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.12 Employee benefits (continued)

Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognises the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

Post-employment benefits: Defined benefit plans

The municipality does not have post employment benefit plans. However, the municipality recognises its employees who have completed 10, 20, 30, 40 years of service in terms of the collective agreement.

Actuarial valuations are conducted on an annual basis by independent actuaries. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

1.13 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.13 Provisions and contingencies (continued)

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

A constructive obligation to restructure arises only when a municipality:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of a activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

1.14 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity – therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

1.15 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.15 Revenue from exchange transactions (continued)

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by the proportion that costs incurred to date bear to the total estimated costs of the transaction.

1.16 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by an municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arise when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, an municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.16 Revenue from non-exchange transactions (continued)

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Taxes

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for income tax is the earning of assessable income during the taxation period by the taxpayer.

The taxable event for value added tax is the undertaking of taxable activity during the taxation period by the taxpayer.

The taxable event for customs duty is the movement of dutiable goods or services across the customs boundary.

The taxable event for estate duty is the death of a person owning taxable property.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.16 Revenue from non-exchange transactions (continued)

Transfers

Apart from Services in kind, which are not recognised, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in-kind

Except for financial guarantee contracts, the municipality recognise services in-kind that are significant to its operations and/or service delivery objectives as assets and recognise the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality disclose the nature and type of services in-kind received during the reporting period.

Concessionary loans received

A concessionary loan is a loan granted to or received by an property, plant and equipment on terms that are not market related.

The portion of the loan that is repayable, along with any interest payments, is an exchange transaction and is accounted for in accordance with the Standard of GRAP on Financial Instruments. The off-market portion of the loan is a non-exchange transaction. The off-market portion of the loan that is recognised as non-exchange revenue is calculated as the difference between the proceeds received from the loan, and the present value of the contractual cash flows of the loan, discounted using a market related rate of interest.

The recognition of revenue is determined by the nature of any conditions that exist in the loan agreement that may give rise to a liability. Where a liability exists the cash flow statement recognises revenue as and when it satisfies the conditions of the loan agreement.

1.17 Commitments

The term commitments' is not defined in any of the standards but may be referred to as the intention to commit to an outflow from the municipality of resources embodying economic benefits. Generally, a commitment arises when a decision is made to incur a liability in the form of a purchase contract (or similar documentation). Such a contractual commitment would be accompanied by, but not limited to, actions taken to determine the amount of the eventual resource outflow or a reliable estimate e.g. a quote, and conditions to be satisfied to establish an obligation e.g. delivery schedules. These preconditions ensure that the information relating to commitments is relevant and capable of reliable measurement. An agency may enter into a contract on or before the reporting date for expenditure over subsequent accounting periods e.g. a contract for construction of infrastructure assets, the purchase of major items of plant and equipment or significant consultancy contracts. In these events, a commitment exists at the reporting date as the municipality has contracted for expenditure but work has not commenced and no payments have been made.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.18 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.19 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.20 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

1.21 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.22 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.23 Irregular expenditure

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and which have not been condoned as the end of the year must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management (Act No.56 of 2003), the Municipal Systems (Act No.32 of 2000), and the Public Office Bearers (Act No. 20 of 1998) or is in contravention of the economic municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

Impendle Local Municipality

Annual Financial Statements for the year ended 30 June 2017

Accounting Policies

1.24 Revaluation reserve

The surplus arising from the revaluation of property, plant and equipment is credited to a non-distributable reserve. The revaluation surplus is realised as revalued buildings are depreciated, through a transfer from the revaluation reserve to the accumulated surplus/deficit. On disposal, the net revaluation surplus is transferred to the accumulated surplus/deficit while gains or losses on disposal, based on revalued amounts, are credited or charged to the statement of financial performance.

1.25 Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

1.26 Segment information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

Segmental information on property, plant and equipment, as well as income and expenditure, is set out in Appendices C and D, based on the International Government Financial Statistics classifications and budget formats prescribed by National Treasury. The municipality operates solely in its area of jurisdiction as determined by the Demarcation Board.

Segment information is prepared in conformity with the accounting policies applied for preparing and presenting the financial statements.

1.27 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2016/07/01 to 2017/06/30.

The budget for the economic entity includes all the entities approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

1.28 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Accounting Policies

1.28 Related parties (continued)

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

1.29 Value Added Taxation

The Municipality accounts for Value Added Tax on payment basis. This means that VAT is declared to the South African Receiver of Revenue Services as input VAT or output VAT only when payments are made to suppliers or invoices made out to customers for goods and services. The net output VAT on debtors where money has not been received or creditors where payments has not yet been made is disclosed separately in the Statements of Financial Position in terms of GRAP 1.

1.30 Events after the Reporting Period

Adjusting and non-adjusting events may occur between the reporting date and the date the report is authorised for issue. Where an adjusting event occurs that affects a liability that has been disclosed, for example, the amount or timing of a liability has altered or an uncertainty relating to a provision has been removed, then an adjustment to that item is required. Where a future obligation relating to a contingent liability has been confirmed, i.e. a court case is settled after the reporting date and the contingency has previously been disclosed in a note, then a liability or provision will need to be recognised as follows:

- as a provision if some uncertainty still exists with respect to the amount or timing of the discharge of the obligation; or
- as a liability if no uncertainties exist. Where a non-adjusting event occurs relating to liabilities, for example, the market value of a financial liability changes after the reporting date, no adjustments are made to the financial statements. However, if a non-adjusting event is material, the agency must disclose the following for each material category of non-adjusting event after the reporting date: the nature of the event; and
- an estimate of its financial effect, or a statement that such an estimate cannot be made.

2. New standards and interpretations

2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

GRAP 16 (as amended 2016): Investment Property

Amendments to the Standard of GRAP on Investment Property resulted from editorial changes to the original text and inconsistencies in measurement requirements in GRAP 23 and other asset-related Standards of GRAP in relation to the treatment of transaction costs. Other changes resulted from changes made to IAS 40 on Investment Property (IAS 40) as a result of the IASB's amendments on Annual Improvements to IFRSs 2011 – 2013 Cycle issued in December 2013.

The most significant changes to the Standard are:

- General improvements: To clarify the treatment of transaction costs and other costs incurred on assets acquired in non-exchange transactions to be in line with the principle in GRAP 23 (paragraph .12); and To clarify the measurement principle when assets may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets.
- IASB amendments: To clarify the interrelationship between the Standards of GRAP on Transfer of Functions Between Entities Not Under Common Control and Investment Property when classifying investment property or owner-occupied property.

The effective date of the amendment is for years beginning on or after 01 April 2018.

The municipality expects to adopt the amendment for the first time in the 2018 annual financial statements.

The impact of the standard is set out in note of Changes in Accounting Policy.

GRAP 17 (as amended 2016): Property, Plant and Equipment

Amendments to the Standard of GRAP on Property, Plant and Equipment resulted from editorial changes to the original text and inconsistencies in measurement requirements in GRAP 23 and other asset-related Standards of GRAP in relation to the treatment of transaction costs. Other changes resulted from changes made to IPSAS 17 on Property, Plant and Equipment (IPSAS 17) as a result of the IPSASB's Improvements to IPSASs 2014 issued in January 2015 and Improvements to IPSASs 2015 issued in March 2016.

The most significant changes to the Standard are:

- General improvements: To clarify the treatment of transaction costs and other costs incurred on assets acquired in non-exchange transactions to be in line with the principle in GRAP 23 (paragraph .12); and To clarify the measurement principle when assets may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets.
- IPSASB amendments: To clarify the revaluation methodology of the carrying amount and accumulated depreciation when an item of property, plant, and equipment is revalued; To clarify acceptable methods of depreciating assets; To align terminology in GRAP 17 with that in IPSAS 17. The term "specialist military equipment" in IPSAS 17 was replaced with the term "weapon systems" and provides a description of what it comprises in accordance with Government Finance Statistics terminology; and To define a bearer plant and include bearer plants within the scope of GRAP 17, while the produce growing on bearer plants will remain within the scope of GRAP 27.

The effective date of the amendment is for years beginning on or after 01 April 2018.

The municipality expects to adopt the amendment for the first time in the 2018 annual financial statements.

The impact of the standard is set out in note of Changes in Accounting Policy.

GRAP 31 (as amended 2016): Intangible Assets

Amendments to the Standard of GRAP on Intangible Assets resulted from inconsistencies in measurement requirements in GRAP 23 and other asset-related Standards of GRAP in relation to the treatment of transaction costs. Other changes resulted from changes made to IPSAS 31 on Intangible Assets (IPSAS 31) as a result of the IPSASB's Improvements to IPSASs 2014 issued in January 2015.

2. New standards and interpretations (continued)

The most significant changes to the Standard are:

- General improvements: To add the treatment of transaction costs and other costs incurred on assets acquired in non-exchange transactions to be in line with the principle in GRAP 23 (paragraph .12); and To clarify the measurement principle when assets may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets
- IPSASB amendments: To clarify the revaluation methodology of the carrying amount and accumulated depreciation when an item of intangible assets is revalued; and To clarify acceptable methods of depreciating assets

The effective date of the amendment is for years beginning on or after 01 April 2018.

The municipality expects to adopt the amendment for the first time in the 2018 annual financial statements.

The impact of the standard is set out in note of Changes in Accounting Policy..

Pledged as security

There were no item of property, plant and equipment that were pledged as security for overdraft facilities during the 2016/17 financial year. Investment properties are fair-valued by an independent valuer every year. The valuation was performed using the market related research to establish market value on investment properties.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

Details of valuation

The effective date of the revaluations was Friday, 30 June 2017. Revaluations were performed by an independent valuer, Mills Fitchets who is not connected to the municipality and have recent experience in location and have suitable qualifications in the category of the investment property being valued.

The valuation was based on open market value for existing use.

These assumptions are based on current market conditions.

14. Unspent conditional grants and receipts

The municipality received in total an amount of R33 643 262 for conditional grants during the 2016/2017 financial year. The municipality had an unspent amount of R813 571 at the end of the financial year 2016/2017.

Unspent conditional grants and receipts comprises of:

Unspent conditional grants and receipts

Sports Field - KwaNxamalala Grant	75 015	-
Housing Fund Grant	381 091	381 091
Electrification Grant	75 908	-
Sport and Recreation Grant	281 557	-
	813 571	381 091

Movement during the year

Balance at the beginning of the year	381 091	464 160
Additions during the year	33 343 262	32 258 440
Income recognition during the year	(32 910 782)	(32 341 509)
	813 571	381 091

These amounts are invested in a ring-fenced investment until utilised. Revenue is only recognised from these conditional grants once all conditions relating to expenditure are fulfilled.

15. Provisions

Reconciliation of provisions - 2017

	Opening Balance	Additions	Utilised during the year	Total
Environmental rehabilitation	810 000	81 000	-	891 000
Leave pay provision	1 787 689	285 620	(342 344)	1 730 965
	2 597 689	366 620	(342 344)	2 621 965

Reconciliation of provisions - 2016

	Opening Balance	Additions	Utilised during the year	Total
Environmental rehabilitation	810 000	40 579	(40 579)	810 000
Leave pay provision	1 137 832	697 614	(47 757)	1 787 689
	1 947 832	738 193	(88 336)	2 597 689

The provisions for the above relates to expenses directly attributed to the rehabilitation of landfill site and leave pay-out for staff leave days. The municipality expects to incur these expenses during the next financial year and the amount to be incurred is uncertain.

Environmental rehabilitation provision

In terms of the licencing of the Landfill refuse site, the municipality will incur licensing costs and rehabilitation costs estimated at R891,000 to restore the site at the end of its useful life. Provision has been made, taking into account the independent valuer's report, for the net present value of this cost, using the average cost of borrowing interest rate. The provision will be funded internally by internally generated revenue.

The municipality is not certain of the amount which might be incurred in the rehabilitation of the landfill site.

Employee benefit cost provision

The above provision for leave pay relates to the number of days accumulated by the employees during the reporting period. The leave pay provision is calculated on all outstanding leave balances as at 30 June 2017. This is the amount that the employees would be entitled to receive should the employees resign or cease employment with the municipality on 30 June 2017.

The municipality is not certain when will the leave days be paid out to employees as this depends on when will employees resign or cease employment with the municipality.

16. Long Term Loan

Non-current

ABSA Loan	1 868 081	2 416 708
Less : Short - term portion transferred to current liabilities	(603 028)	(548 627)
	1 265 053	1 868 081

Current liabilities

Current portion of Long term loan	603 028	548 627
-----------------------------------	---------	---------

During 2015/16 financial year, the municipality had taken a long-term loan of R3 million. The loan is repaid in sixty (60) monthly installments over the period of loan term at a fixed interest rate of 9.50 percent.

-----------------	------	------

17. Employee benefit obligations- Long Service Award

	2017	2016
Movement in the present value of the defined benefit obligation		
Opening Balance	610 695	445 623
Current service Costs	93 625	78 809
Interest cost	49 922	36 771
Actuarial (gain)/losses	(88 116)	49 492
	666 126	610 695

The actuarial valuation of long service award report has been performed by One Pangaea Financial. The Projected Unit Credit Method has been used to value the long service award and the effective date of this valuation is 30 June 2017.

Key assumptions used

Assumptions used at the reporting date: The expected inflation assumption of 5.64% was obtained from the differential between market yields on index-linked bonds (2.56%) consistent with the estimated terms of the liabilities and those of nominal bonds (8.84%) with a risk premium adjustment for the uncertainty implicit in guaranteeing real increases (0.50%). Therefore, expected inflation is determined as $((1+8.84\%-0.50\%)/(1+2.56\%))-1$. Thus, a general salary inflation rate of 6.64% per annum over the expected term of the liability has been assumed, which is 1.00% higher than the estimate of CPI inflation over the same term. This assumption reflects a net discount rate of 2.06%. It has been assumed that the next salary increase will take place on 1 July 2017.

Salary Inflation Rate: This assumption is required to reflect the estimated growth in salaries of the eligible employees until retirement. It is important in that the Long Service Awards are based on an employee's salary at the date of the award.

General Salary Inflation: This assumption is more stable relative to the growth in Consumer Price Index than in absolute terms. Experience has shown that over the long term, salary inflation will exceed general inflation by 1.0%.

Key Financial Assumptions

Discount Rate	8.84%	8.60%
General Salary Inflation	6.64%	7.25%

The salaries used in the valuation include an assumed increase on 01 July 2017 of 7.36% as per the SALGBC Circular No: 02//2017. The next salary increase was assumed to take place on 01 July 2018.

Thusong Grant

Balance unspent at beginning of year	-	70 442
Conditions met - transferred to revenue	-	(70 442)
	-	-

Conditions still to be met - remain liabilities (see note 14).

This is an ongoing initiative that focuses in the rural areas and under-serviced areas with the following key objectives:

- To bring government information and services closer to the people and to promote cost-effective, integrated, efficient and sustainable service provision to better serve the needs of citizens;
- To promote access to opportunities as a basis for improved livelihoods;
- To create a platform for greater dialogue between citizens and government.

Finance Management Grant

Current-year receipts	1 825 000	1 800 000
Conditions met - transferred to revenue	(1 825 000)	(1 800 000)
	-	-

The grant is to be used to finance the cost for the establishment of budget and treasury office, establishment of supply chain management, internal audit and audit committee, appointment and training of finance interns, preparing and timely submission of annual financial statements, implement corrective actions to address audit findings and the implementation of a financial recovery plan and implementation thereof where appropriate.

The grant was transferred by National Treasury.

The focus of this grant is to promote and support reforms of financial management by building capacity in municipalities to implement the Municipal Finance Management Act No.56 of 2003.

As at 30 June 2017, implementation was 100% complete and the grant had been spent in full.

Municipal Systems Improvement Grant

Current-year receipts	-	930 000
Conditions met - transferred to revenue	-	(930 000)
	-	-

All conditions of the grant were met.

This grant is to be used for municipal systems improvement.

The grant was transferred by National Cooperative Governance and Traditional Affairs.

The focus of this grant is to assist municipalities in building in-house capacity to perform their functions and stabilise institutional and governance systems that support effective service delivery as required in the Municipal Systems Act, 2000 and related legislations and policies.

Library Grant (Art and Culture)

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

Figures in Rand	2017	2016
30. Impairment of assets		
Impairments		
Property, plant and equipment	344 874	4 643 033
Plant and Equipment and Infrastructure Assets were revalued and assessed for impairment during the reporting period. Certain Plant within the Plant & Equipment was subsequently impaired by R344 874 and impairment was reversed on certain Infrastructure Assets which were previously impaired. The impairment reversal amounted to R1 151 044.		
Reversal of impairments		
Property, plant and equipment	(1 151 044)	(690 723)
Infrastructure assets which were previously impaired, were revalued and the impairment loss for the previous year was reversed. The recoverable service amount of the asset was based on its fair value less its value in use.		
Total impairment losses (recognised) reversed	(806 170)	3 952 310
During the 2015/16 financial year, infrastructure assets were impaired with an amount of R3 952 310. This class of assets above was revalued during the 2016/17 financial year and resulted in impairment reversal of R806 170.		
31. Finance costs		
Non-current borrowings	255 997	292 983
Total interest expense, calculated using the effective interest rate, on financial instruments not at fair value through surplus or deficit amounted to R255 997 - (2016: R 292 983).		
32. Bad Debts		
Bad Debts	11 297	167 721
33. Contracted services		
Repairs and Maintenance	474 028	871 455
Specialist Services	1 563 411	1 480 499
	2 037 439	2 351 954
Contracted services were for services rendered by Chubb, Nashua, Minolta for the rental of security alarms and photocopying machines.		
34. Grants funded expenditure		
Other subsidies

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

Figures in Rand	2017	2016
-----------------	------	------

38. Commitments

Authorised capital expenditure

Already contracted for but not provided for

• Property, plant and equipment	8 403 739	2 315 825
---------------------------------	-----------	-----------

Total capital commitments

Already contracted for but not provided for	8 403 739	2 315 825
---	-----------	-----------

This committed expenditure relates to plant and equipment and will be financed by available Municipal Infrastructure Grant Allocation gazetted in the 2016/17 DORA Allocation.

The operating commitments includes outstanding operating leases commitments which are financed by the operating revenue through surplus income and equitable share.

Operating leases - as lessee (expense)

Minimum lease payments due

- within one year	711 505	668 915
- in second to fifth year inclusive	926 692	1 638 197
	1 638 197	2 307 112

Operating lease payments represent rentals payable by the municipality for certain of its office photocopying machines. Leases are negotiated for an average term of five years and rentals have straightlined for the lease term duration. No contingent rent is payable.

Operating leases - as lessor (income)

Minimum lease payments due

- within one year	488 643	423 879
- in second to fifth year inclusive	337 402	826 045
	826 045	1 249 924

Certain of the municipality's facilities is held to generate rental income. Rental of these facilities is expected to generate rental on an ongoing basis. Lease agreements are cancelable with three months written notice by either party and have terms from 1 to 5 years. There are no contingent rents receivable.

39. Related parties

There were no related party transactions as at the end of the financial period.

40. Prior period errors

The Municipality identified errors relating to rental income that had not been billed in the previous year, this lead to a restatement of R205 400 in the previous year. A further error relating to overstated rental income due to expired contract in the 2015 financial year was identified. This resulted in an adjustment of R170 326 on the accumulated surplus.

The correction of the error(s) results in adjustment as follows]

41. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

42. Fruitless and wasteful expenditure

Opening Balance	2 019	1 148 244
Amount report to council and written off	-	(1 148 244)
Current year amount	1 354	2 019
	3 373	2 019

The fruitless and wasteful expenditure for the previous period was reported to council for investigation. Council resolved to write-off the expenditure following investigation outcomes.

The fruitless and wasteful expenditure for the current year relates interest charged by service providers for late payment of invoices.

43. Irregular expenditure

Opening balance	44 947	1 642 500

44. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the and includes a note to the annual financial statements.

In terms of section 36 of the Municipal Supply Chain Management Regulations, any deviation from Supply Chain Management Policy needs to be approved by the Accounting Officer and noted by Council. All expenses incurred have been condoned by Council.

All deviations have been approved by Council and have been report in terms of section 114 of the Municipal Finance Management Act, 56 of 2003.

Summary of deviations:

	MFMA Regulations	2017	2016
Transport services	36(1)(a)(ii)	262 098	178 327
Advertisement services	36(1)(a)(v)	149 376	269 997
Repairs of plant	36(1)(a)(ii)	75 253	118 082
Other	36(1)(a)(ii)	24 305	139 922
		511 032	706 328

45. Budget differences

The excess of actual expenditure over the final budget of 15% over or under approved budget is explained under this note.

Material differences between budget and actual amounts

Rendering of services- This relates to actual commission income from motor licensing in excess of budgeted income which includes planning fees that were not anticipated thus were not budgeted for.

Rental Income- Transfer of operating lease income that was budgeted as rental of facilities and equipment.

Interest received on investments- Interest accrued on investments which relates to conditional grants was higher than budgeted for due to high rate of return on investments and a further investment of MIG during the latter part of the year.

Rental of facilities and equipment- Contracts not concluded with Social Development and thus not billed as budgeted.
Donations received- This relates to donated assets which were received at the latter stage of the financial year.

Other Income- Budgeted income comprises of housing grant own income, interest on outstanding debtors that was budgeted for under investment income.

Property rates penalties- Albeit municipal credit control and debt management policy stipulates a charge for interest against outstanding debt, it is not feasible to charge twelve months interest on outstanding customers as 90% are not paying their accounts.

Government Grants- Budget has not taken into account capital expenditure whilst income per GRAP Standard includes MIG and other capital related expenditure recognised as revenue.

Administration- A portion of administration expenditure budgeted for included as general expenses.

Depreciation and amortisation- the variance in budget is as a result of huge amounts of Work-in-progress capitalised during the reporting period.

Bad debt written off- The municipality did not anticipate writing off debtors and this line item was not budgeted for.

Impairment loss/ Reversal of impairment loss- this relates to revaluation of infrastructure assets which is done at year-end.

Annual Financial Statements for the year ended 30 June 2017

Notes to the Annual Financial Statements

Figures in Rand

45. Budget differences (continued)

Finance Costs- interest on long service awards was not budgeted for during the reporting period.

Debt impairment- debtors impairment per write-off, accounting policy and Municipal Property Rates Act (Section 17).

Contracted Services- expenditure relating to contract services transferred from telephone expense which resulted in an increase in the contracted services expense.

Grants and Subsidies- expenditure of roll-over grants recognised as revenue.

General expenses- the municipality applied stringent monitoring measure on general expenses to cut down costs.

Fair value adjustments- this relates to appraisal of investment properties owned by the municipality, this item is a non-cash item and as such it was not budgeted for during the reporting period.

Interest income- Grants received were expected to finished in the earlier half of the reporting period.

Receipts from customers- relates to receipts for property rates, rates clearance certificates that was collected during the year. Included is also the rental income and hire of facilities.

Grants- The municipality received an additional funding from National Treasury for MIG towards the financial year end.

Interest received- investments- This relates to accrued interest on short-term deposits which relates to unspent conditional grants which was higher due to high rate of return on investment and a further receipt of additional MIG funding during the latter part of the year.

Other receipts- Comprises of housing grant, own income and interest on outstanding debtors that were budgeted for the year whilst actual income relates to housing income only.

Payment to suppliers- relates to additional payment made on capital expenditure to contracted/ awarded contractors. Includes portion of FBE to be classified under transfers and grants.

Changes from the approved budget to the final budget

The changes between the approved and final budget are a consequence of reallocations within the approved budget parameters.

Rental of Facilities and Equipment - In line with MFMA S72 report, six months actuals had exceeded 50% thus necessitated adjustment.

Agency Services - In line with MFMA S72 report, six months actuals had exceeded 50% thus necessitated adjustment.

Other Income - Increase due to funding received from LGSETA

Interest Received - Revenue forecast was lower than actual collection as at mid year.

Contracted services - Increase due to actual at mid year being higher than 50%.

Transfers and subsidies - Decrease due to redemacation of FBE beneficiaries.

Consumer Debtors - Anticipated revenue collection and debtors book reduction at mid year not achieved.

Property plant and Equipment - Increase relate to increase in additional completed assets forecast for year end.

Provisions - Increase relate to provisions for staff leave and landfill rehabilitation.

Long Term Loan - Absa loan as per amortisation
